

NSW SMART (Shark-Management-Alert-in-Real-Time) Drumlines Report

1 July 2021 to 30 June 2022

Operation

During the 12-month period, 20 SMART drumlines were deployed for 222 days (60.8%) at Ballina-Lennox Head and 15 SMART drumlines for 287 days (78.6%) at Evans Head (Table 1).

The program also saw the start of 18 other SMART drumline regions between November 2021 and April 2022, resulting in an additional 1,749 fishing days (Table 1).

Catch

Over the 12-month period, 389 target sharks were caught (Table 2 and 3): 47 Bull Sharks, 105 Tiger Sharks (which included 2 recaptures, 1 of which was tagged prior to this 12-month period) and 237 White Sharks (which included 54 recaptures, 28 of which were tagged prior to this 12-month period). There were 559 non-target animals caught (which included 7 recaptures, 1 of which was tagged prior to this 12-month period) across 17 species (Table 2 and 3).

Tagging

All animals except turtles, rays and finfish received identification tags. Only White Sharks, Bull Sharks and Tiger Sharks are fitted with acoustic tags (Table 3) and/or satellite tags.

During the 12-month period, 231 White Sharks, 99 Tiger Sharks and 46 Bull Sharks received external identification and acoustic tags. Thirteen target sharks and 22 non-target sharks were not tagged because the ocean conditions were too rough to apply tags safely, or the animals died, or they escaped prior to tagging.

Comments

Sixty-one SMART drumlines failed to set off an alert, with the contractor finding a White Shark, Common Blacktip Shark, Shortfin mako, Smooth Hammerhead, two Tailor and four Dusky Whalers dead when they arrived at the drumline for retrieval at the end of the day (Table 3). A further three animals triggered the lines but on arrival a Snapper that had been bitten by a shark and Sandbar Shark were found dead; and a White Shark that had been gut-hooked died while the contractors had it secured to the boat. All other animals triggered an alert to the DPI contractors who responded and were at the SMART drumline in an average of 20 minutes.

Table 1: SMART drumline regions, number of fishing and potential days, and commencement dates for each of the 20 locations

Location	Fishing days	Possible days	Commencement date
Kingscliff	124	234	9 November 2021
